Brief Course Description

This course introduces students to the humanities and social sciences by providing foundational knowledge of key ideas that underpin the modern world, some major issues that are debated in contemporary society, and the modes of inquiry that are utilised by the humanities and social sciences for examining, understanding and explaining these issues.

Ideas, Issues and Inquiry examines the question, "What does it mean to be human now?" The course introduces you to how the humanities and social sciences, with their many related areas of study, can provide disciplinary and interdisciplinary perspectives on a range of key issues facing the contemporary world.

Four key modules provide a context for the course content:

- The Idea of Humanity
- Identities and Communities
- Values, Beliefs and Politics
- Big, Complex Issues

Through readings, focus questions, lectures (one hour per week), tutorial activities (two hours per week) and workshops (1 hour per week), resources and assessment tasks, we demonstrate how different approaches used in the humanities, social sciences, cultural studies, arts and media can be used to think, question, research, and share ideas in scholarly and creative ways. Approaching this course well-prepared, openly and flexibly, you can all enrich your understandings about yourselves and others; about society and culture; and about the personal, local, regional and global challenges and opportunities we currently face regarding our responsibilities towards other humans; and how we exercise stewardship in relation to the Earth and the other species with which we share it.

Rationale

As a core course in the Diploma of Arts and Communication, a central aim of 1061LHS Ideas, Issues and Inquiry is to help students make informed choices about their developing interests and potential majors or minors. Students will gain valuable insights into how scholarly concepts and methods from humanities and social sciences can help you to engage with the human, social and cultural questions that interest or concern you in your field/s. This course gives you the opportunity to see humanities and social sciences disciplines in action, gaining insights into specialist fields, and appreciating how interdisciplinary work draws on several ways of thinking in order to deal productively with complex challenges. Your tutor will help you revisit content and concepts encountered in the lectures and resources. Tutorials will also provide opportunities to contribute to each other's learning by raising other matters that concern you and your peers. They will assist you in preparing for assessment and encourage you to reflect on your learning.

The assessment tasks are designed to enable you to use and review your developing knowledge about the ideas, issues, concepts, processes, methods and disciplines explored in the course. In responding to the assessment tasks you are warmly encouraged to draw on your own interests and concerns *as relevant to the course*. We stress that if you have any concerns about how you are undertaking a task, you should be comfortable about discussing your ideas with your tutor.

Aims

The aims of this course are to:

- develop your understanding of the ways in which the humanities and social sciences engage with significant issues of human existence;
 - appreciate the importance of informed thinking about pressing contemporary challenges in society and culture;
 - demonstrate how a variety of humanities and social science disciplines make use of divergent and convergent approaches to exploration of ideas within and across fields of study;
 - engage with a range of methods of inquiry that lead to graduate attributes of strong research and communication skills.
-

Learning Outcomes

After successfully completing this course you should be able to:

- 1 Work collaboratively to investigate questions that arise in the consideration of humanity, identity, community, values and challenges facing the contemporary world.
 - 2 Explore significant issues of human existence through skills and processes of inquiry, reflection and creative thinking.
 - 3 Understand a range of ways in which key areas of study in the humanities and social sciences work with knowledge separately, together and in interdisciplinary contexts with other fields.
 - 4 Build on concepts and processes you have learned, reflections about yourself and your interests, and your developing social and cultural concerns, to identify potential career pathways.
-

Texts and Supporting Materials

You will be provided with a list of readings made available on the MyStudy course site for 1061LHS.

Organisation and Teaching Strategies

Class Contact Summary

- Lecture: 1 hour
- Tutorials/ Workshop: 3 hours

Attendance

100% attendance is expected for all classes. You are reminded that your attendance in class will be marked for all elements. To receive full attendance, you must be present in the classroom on all occasions. You are expected to bring work done at home to class for group and individual discussion. Further development of ideas is expected during tutorial time.

Preparation and Participation in Class

You are expected to read your required readings and the lecture notes before class so that each week you can actively contribute to your learning and the learning of others in your classes. You are expected to ask and answer questions and to initiate discussions and stimulate debate in group and class situations.

Consultation Times

Attendance during consultation times is optional and students are encouraged to use this extra help to enable you to meet the stated learning outcomes.

Course Materials

Lecture notes, weekly readings and assessment information will be made available on MyStudy for students.

Independent Study

Independent study requires that you spend time outside classes engaged in activity necessary to complete your assignments. This includes reading the required text books, completing weekly activities and using library and internet facilities. For this 10 CP course, you will need to spend at least 10 hours per week engaged in activities that will help your learning and fulfil the course objectives. Thus, provided you have well used the formal contact hours each week, you would then complete any remaining hours engaged in independent study.

Program Progression

Students are reminded that satisfactory Program Progression requires that attendance in classes is maintained at equal to or greater than 80%, and that GPA is maintained at equal to or greater than 3.5 (Australian students) or equal to or greater than 4.0 (International students) in any semester [please see Griffith College Policy Library - Program Progression Policy - for more information].

 - The concepts/issues you found most interesting about time and history from the week 6 reading/s, lecture and focus questions.
 - The things to which you responded most strongly as a result of your conversation with an older person.
 - Your choice of response to that conversation in terms of format, style and structure.
