Brief Course Description

This course introduces key ideas and institutions associated with law and its production in Australia. It examines how law is made by courts and parliaments, and the principal legal and political conventions and processes involved in law making. This knowledge provides a foundation for further study on criminal law and justice systems.

This is a core, introductory course in the Criminology and Criminal Justice program. It gives students an overview of the role of law in Australian society, and how it is made, influenced and applied by courts and by governments. These concepts and processes are an essential framework for the criminal justice system and knowledge developed in this course provides a foundation for later studies in criminology and criminal justice, and for employment in the field.

The central focus of the course is on examining how law and politics operate and interact in society. The relationship between concepts like rules, morality, justice, politics and power are also examined. Students think critically about the law-making process, and consider diverse issues including: the moral content of laws; liberalism, legalism and the rule of law; the role of judges; indigenous rights and justice; the nature of democracy; the exercise and control of government power; and human rights. This is done through the use of case studies to encourage a problem-based approach to learning.

The course also has a strong focus on skill development for both academic and vocational purposes, especially research, writing and critical analysis.

Aims

This is a core, introductory course in the Criminology and Criminal Justice program. It aims to 1) give an overview of the role of law and politics in Australian society; 2) consider the relationship between law and politics, particularly how law is influenced and applied by courts and by governments in a range of contexts; and 3) encourage critical thinking about the law-making process and its relationship with criminal justice, using case studies as the basis for a problem-based learning approach.

The central focus of the course is on examining how law operates in society, and its relationship with concepts like rules, morality, justice, politics and power. The course also has a strong focus on skill development for both academic and vocational purposes, especially research, writing and critical analysis. On completion of this course students should be able to write clearly and analytically in appropriate academic style and engage in informed and reflective discussion about issues raised in the course.

Learning Outcomes

Upon successful completion of this course students will be able to...

1. Describe key institutions involved in making and influencing laws in Australia.
2. Understand principles and theories underlying Australian law and government.

Academic Integrity

Griffith College is committed to maintaining high academic standards to protect the value of its qualifications. Academic integrity means acting with the values of honesty, trust, fairness, respect and responsibility in learning, teaching and research. It is important for students, teachers, researchers and all staff to act in an honest way, be responsible for their actions, and show fairness in every part of their work. Academic integrity is important for an individual's and the College's reputation.

All staff and students of the College are responsible for academic integrity. As a student, you are expected to conduct your studies honestly, ethically and in accordance with accepted standards of academic conduct. Any form of academic conduct that is contrary to these standards is considered a breach of academic integrity and is unacceptable.

Some students deliberately breach academic integrity standards with intent to deceive. This conscious, pre-meditated form of cheating is considered to be one of the most serious forms of fraudulent academic behaviour, for which the College has zero tolerance and for which penalties, including exclusion from the College, will be applied.

However, Griffith College also recognises many students breach academic integrity standards without intent to deceive. In these cases, students may be required to undertake additional educational activities to remediate their behaviour and may also be provided appropriate advice by academic staff.

As you undertake your studies at Griffith College, your lecturers, tutors and academic advisors will provide you with guidance to understand and maintain academic integrity; however, it is also your responsibility to seek out guidance if and when you are unsure about appropriate academic conduct.

In the case of a breach of academic integrity made against a student he or she may request the guidance and support of a Griffith College Student Learning Advisor or Student Counsellor.

Please ensure that you are familiar with the [Griffith College Academic Integrity Policy](#); this policy provides an overview of some of the behaviours that are considered breaches of academic integrity, as well as the penalties and processes involved when a breach is identified.

For further information please refer to the Academic Integrity Policy on the Griffith College website – Policy Library.
