Brief Course Description

Academic and Professional Skills Development is a 10 Credit Point course within the Diplomas of Commerce, Criminology and Criminal Justice, Graphic Design, Hotel Management and Arts and Communication. The course is situated within the first semester of each of these programs. These Diplomas are designed to provide students with a pathway to:

- * further university studies in related degrees or
- * direct employment.

The course offers students a broad introduction to the skills involved in acquiring information and in displaying knowledge to others. It includes the basic knowledge and skills required to successfully participate in an undergraduate degree program and to operate effectively in a professional context.

Rationale

Academic and Professional Skills Development meets the needs of all students for the development of knowledge and skills within a university or professional context.

Aims

Academic and Professional Skills Development enables students to develop skills in three main areas along with the relevant academic language. The areas are interwoven throughout the course so that learning is maximised by ensuring that basic skills are consolidated before more advanced skills are introduced.

The first area covers general learning skills relevant to both in a university or a professional context. It includes skills related to academic integrity, individual learning approaches and strategies and analytical and critical thinking. It also enhances learning skills by developing awareness of the relationship between culture and educational style.

The second area of skills are those required to extend students' learning beyond lectures and textbooks. Students will learn techniques for recognising different types of texts, searching databases, understanding the production of research, reading the literature analytically and critically and applying knowledge to 'real world' contexts.

The third area is concerned with the skills students require to display information in the most

effective manner. It deals with oral presentations, essays, case studies and examinations. Among the written skills addressed are: citation and referencing skills, paragraphing, developing an argument, and using the literature to support an argument. This area also includes the oral skills needed in questioning and responding in a tutorial and in giving presentations.

Learning Outcomes

Upon the successful completion of the course you will be able to:

- 1.** Adopt and use appropriate learning orientations and reflective practices in order to nurture identified skills required for the purpose of building academic and professional capabilities.
 - 2.** Select and / or evaluate scholarly literature, in order plan, analyse, synthesise, organise, and communicate relevant information through a range of academic contexts and modes;
 - 3.** Respond critically to topics, scenarios, questions or hypotheses in various written and spoken modes and display attribution of source material using accepted referencing conventions where required;
 - 4.** Use a range of co-operative learning and group work techniques to enhance collaboration experiences and outcomes;
 - 5.** Apply core values of academic integrity in own learning to build social and ethical responsibility.

Organisation and Teaching Strategies

The course consists of a two-hour lecture and one-hour workshop and one-hour tutorial each week. The lectures are interactive to enable maximum learning. You are encouraged to participate through asking questions, positively contributing to discussions and completing short relevant exercises.

The workshops and tutorials are designed to enhance learning using practical exercises. You will be involved in both individual and group work in these sessions.

Course material is first presented to you in the lectures. It will be consolidated the following week during the tutorial and workshop.

Class Contact Summary

Attendance

You are expected to attend all lectures and tutorials and to actively engage in learning during these sessions. You are expected to bring all necessary learning resources to class such as the required textbook and Tutorial and Workshop Guide. In addition, you may BYOD (bring your own device) to class such as a laptop or tablet. This is not a requirement as computer lab facilities are available on campus, however, the use of such devices in the classroom is encouraged with appropriate and considerate use principles being a priority.

Preparation and Participation in Class

In order to enhance learning, prepare before lectures and tutorials. Read the relevant section of your text book before a lecture, and for a tutorial read both the textbook and the relevant lecture notes. If you have been given tutorial exercises, make sure you complete them. Active participation in lectures and tutorials will improve your learning. Ask questions when something is unclear or when you want to bring some issue to your lecturer or tutor's attention; respond to questions to test your knowledge; engage in discussion to help yourself and others learn.

Consultation Times

Teachers offer extra time each week to assist students outside the classroom. This is known as 'consultation time.' You may seek assistance from your teacher on email or in person according to how the teacher has explained this to the class. Attendance during consultation time is optional but you are encouraged to use this extra help to improve your learning outcomes.

Course Materials

Lecture notes will be made available to you on the Learning @ Griffith College website and you are advised to print these out and bring them to each class so that extra notes can be added.

Independent Learning

You will be expected to learn independently. This means you must organise and learn the course content even when you are not specifically asked to do so by your lecturer or tutor. This involves revising the weekly course material. It also means you will need to find additional information for some assessment items beyond that given to you in textbooks and lecture notes, and to construct your own response to a question or topic. All of this requires careful planning of your time. Expect to spend, on average, an additional 6 to 8 hours per week outside of the time spent attending lectures and tutorials, for each of your courses.

Program Progression

You are reminded that satisfactory Program Progression requires that attendance in classes is maintained at equal to or greater than 80% and that GPA is maintained at equal to or greater than 3.5 [please see Griffith College Policy Library - Program Progression Policy - for more information].

Academic integrity means acting with the values of honesty, trust, fairness, respect and responsibility in learning, teaching and research. It is important for students, teachers, researchers and all staff to act in an honest way, be responsible for their actions, and show fairness in every part of their work. Academic integrity is important for an individual's and the College's reputation.

All staff and students of the College are responsible for academic integrity. As a student, you are expected to conduct your studies honestly, ethically and in accordance with accepted standards of academic conduct. Any form of academic conduct that is contrary to these standards is considered a breach of academic integrity and is unacceptable.

Some students deliberately breach academic integrity standards with intent to deceive. This conscious, pre-meditated form of cheating is one of the most serious forms of fraudulent academic behaviour, for which the College has zero tolerance and for which penalties, including exclusion from the College, will be applied.

However, Griffith College also recognises many students breach academic integrity standards without intent to deceive. In these cases, students may be required to undertake additional educational activities to remediate their behaviour and may also be provided appropriate advice by academic staff.

As you undertake your studies at Griffith College, your lecturers, tutors and academic advisors will provide you with guidance to understand and maintain academic integrity; however, it is also your responsibility to seek out guidance if and when you are unsure about appropriate academic conduct.

In the case of any allegation of academic misconduct made against a student he or she may request the guidance and support of a Griffith College Student Learning Advisor or Student Counsellor.

Please ensure that you are familiar with the [Griffith College Academic Integrity Policy](#); this policy provides an overview of some of the behaviours that are considered breaches of academic integrity, as well as the penalties and processes involved when a breach is identified.
