

1. General Course Information

1.1 Course Details

Course Code:	1011SCG
Course Name:	Mathematics 1A
Trimester:	Trimester 2, 2022
Program:	Diploma of Engineering / Diploma of Science
Credit Points:	10 CP
Course Coordinator:	Seyed Nejad
Document modified:	8 June 2022

Course Description

The course introduces basic vector algebra in two and three dimensions, matrices, complex numbers, probability and revises basic functions. It provides a foundation in the mathematical sciences for later studies in science and engineering.

Assumed Knowledge

Quality mathematics skills are fundamental for success in your diploma and future studies. To assist you in assessing your readiness and level of mathematical skills Griffith College has developed a Maths Ready Quiz and your performance on this quiz will enable us to advise the best pathway for your mathematical studies at the College.

Hence all Diploma of Science or Diploma of Engineering students are required to undertake an online maths ready quiz before the trimester commences. Students who do not achieve a satisfactory level on this quiz will be advised to undertake a free trimester long Maths Preparation course (BRM100) before commencing with the Diploma mathematics course.

1.2 Teaching Team

Your teacher/s can be contacted via email as below:

You will also find their email in the Teacher's tile on your Course Site.

Name	Email
Seyed (Hamid) Nejad	seyed.nejad@staff.griffithcollege.edu.au

1.3 Meet with your teacher

Your teacher is available each week to meet outside of normal class times. This is called consultation. Times that your teacher will be available for consultation will be found on the Teacher's tile on your Course Site.

1.4 Timetable

Your timetable is available on the Griffith College Digital Campus at My Apps, Timetable.

1.5 Technical Specifications

All students must have access to a computer or suitable mobile device such as desktop, laptop, or tablet. In addition, up-to-date browser access, a reliable high-speed internet connection with enough upload and download capacity, a webcam and headset including microphone are needed.

2. Aims, Outcomes & Generic Skills

2.1 Course Aims

This course acts as a bridge between the students' previous experience in mathematics and further tertiary study in mathematics. It provides the basis for the acquisition of the basic computational and theoretical skills necessary for the practicing scientist and introduces students to the mathematical and logical way of thinking desirable in the training of these professionals. The course introduces basic vectors in three dimensions, matrices, complex numbers, probability and basic functions in a scientific context. It provides a foundation in the mathematical sciences for later studies in other sciences, as well as mathematics itself.

2.2 Learning Outcomes

After successfully completing this course you should be able to:

- 1 Use basic algebra and all standard linear and quadratic functions to analyse a variety of problems in real life examples.
- 2 Use basic matrix algebra and determine derived quantities from matrices in a scientific context.
- 3 Manipulate 2D and 3D vectors by using vector addition and subtraction, as well as the dot and cross product of vectors, and apply them to problems involving forces, velocity and other relevant vector quantities.
- 4 Carry out basic arithmetic operations using complex numbers for the purposes of application to problems in science and engineering.
- 5 Describe the basic ideas of probability and randomness and apply these ideas to real life problems.

2.3 Generic Skills and Capabilities

For further details on the Generic Skills please refer to the [Graduate Generic Skills and Capabilities policy](#).

Griffith College aims to develop graduates who have an open and critical approach to learning and a capacity for lifelong learning. Through engagement in their studies, students are provided with opportunities to begin the development of these and other generic skills.

Studies in this course will give you opportunities to begin to develop the following skills:

Generic Skills and Capabilities		Taught	Practised	Assessed
Acquisition of discipline knowledge and skills with critical judgement		✓	✓	✓
Communication and collaboration		✓	✓	
Self-directed and active learning		✓	✓	✓
Creative and future thinking		✓	✓	
Social responsibility and ethical awareness			✓	
Cultural competence and awareness in a culturally diverse environment			✓	

3. Learning Resources

3.1 Required Learning Resources

Griffith University notes in Griffith College's portal.

3.2 Recommended Learning Resources

Washington, A. (2009). Basic Technical Mathematics with Calculus (8th or 9th edition) Pearson (Addison Wesley).

Edwards C. H., Penney D. E. (2002) Calculus, Early Transcendentals (matrix version), (6th edition), Prentice Hall.

Swokowski, E., Olinick, M., Pence, D. P. (1996). Calculus (6th ed.) PWS-Kent Publishing Co.

Stewart, A. (2010). Calculus Concepts & Context (4th ed.) Cengage.

Available at: http://www.stewartcalculus.com/media/9_home.php

Fitzgerald, G.F. and Peckham, E.A.(2005) Mathematical Methods for Engineers and Scientists (4th edition) Prentice-Hall.

3.3 College Support Services and Learning Resources

Griffith College provides many facilities and support services to assist students in their studies. Links to information about support resources that are available to students are included below for easy reference.

- [Digital Library](#) – Databases to which Griffith College students have access to through the Griffith Library Databases.
- [Study Toolbox](#) – there is a dedicated website for this course on the Griffith College Digital Campus.
- Academic Integrity - Griffith College is committed to ensuring academic integrity is understood and maintained by all staff and students. All students learn about academic integrity through engagement with Academic Integrity online modules within the Academic and Professional Studies course.
- [Services and Support](#) provides a range of services to support students throughout their studies including academic advice and assignment help from Student Learning Advisors, and personal and welfare support from Student Counsellors.
- [Jobs and Employment](#) in the Student Hub can assist students with career direction, resume and interview preparation, job search tips, and more.
- [IT Support](#) provides details of accessing support, information on s numbers and internet access and computer lab rules.

3.4 Other Information about your Learning

Preparation and Participation in Learning

You need to prepare before attending your scheduled learning experience. Work through the learning content prepared by your teacher which is found on the course site. Make sure you complete the learning activities set each week, they are designed to support your learning. Active participation in your learning will enhance your success. Ask questions when something is unclear or when you want to bring some issue to your teacher's attention; respond to questions to test your knowledge and engage in discussion to help yourself and others learn.

Attendance

You are expected to actively engage in all learning experiences which underpin the learning content in this course. You are expected to engage with the learning content and learning activities outside of timetabled class times. This requires you to be an active agent of your learning. You are expected to bring all necessary learning resources to class such as the required textbook and /or Workbook. In addition, you are encouraged to BYOD (bring your own device) to class such as a laptop or tablet. This is not a requirement as computer lab facilities are available on campus, however, the use of such devices in the classroom is encouraged with appropriate and considerate use principles being a priority.

Consultation Sessions

Teachers offer extra time each week to assist students outside the classroom. This is known as 'consultation time.' You may seek assistance from your teacher on email or in person according to how the teacher has explained this to the class. Attendance during consultation time is optional but you are encouraged to use this extra help to improve your learning outcomes.

Course Learning Materials

Learning materials are made available to you in the course site. The learning materials are arranged in Modules. In each Module you will find Learning Content, Learning Experiences and Learning Activities. **Learning Content** will be engaged with prior to the scheduled **Learning Experience (your weekly class)**. This will ensure you are prepared for the scheduled Learning Experience by being aware of the content to be covered and therefore will be able to actively participate in the session. **Learning Activities** are accessed after the scheduled session for purposes of review, consolidation of learning, and preparation for the Evidence of Learning Tasks in the course.

In addition, **Anytime Anywhere** learning material is provided in the course. This learning material provides support, interactive tools and directions for students who occasionally cannot attend the weekly scheduled Learning Experience (either in person or on Zoom) perhaps due to illness or other commitments. The Anytime Anywhere learning material should also be used in conjunction with Learning Content and Learning Activities resources.

Self-Directed Learning

You will be expected to learn independently. This means you must organise and engage with the course learning content even when you are not specifically asked to do so by your teacher. The weekly guide will be helpful to organise your learning. This involves revising the weekly course learning material and completing the learning activities. It also means you will need to find additional information to evidence your learning beyond that given to you, and to construct your own response to a question or topic. All of this requires careful planning of your time. Expect to spend, on average, at least 10 hours per week including class time for each of your courses.

Program Progression

You are reminded that satisfactory Program Progression requires that attendance in classes is maintained at equal to or greater than 80%, students are engaged in their learning and that GPA is maintained at equal to or greater than 3.5 [please see Griffith College Policy Library - [Program Progression Policy](#) - for more information].

Teacher and Course Evaluation

Your feedback is respected and valued by your teachers. You are encouraged to provide your thoughts on the course and teaching, both positive and critical, directly to your teacher or by completing course and teacher evaluations via Griffith College's evaluation tool whenever these are available.

4. Learning Content, Learning Experiences and Learning Activities

4.1. Modules for Learning and Weekly Learning Content, Learning Experiences and Learning Activities

	Learning Content	Learning experiences	Learning activities	Evidence of learning	Learning outcome
					
	Module 1				
1	Algebra and Linear Functions	Online lessons	Workbook activities	Test 1 Mid-trimester exam	1
2	Algebra and Quadratic Functions	Online homework	Workbook activities	Test 1 Mid-trimester exam	1
	Module 2				
3	Matrices	Online lessons	Workbook activities	Test 1 Mid-trimester exam	2
4	Matrices	Online homework	Workbook activities	Test 1 Mid-trimester exam	2
	Module 3				

5	Vectors	Online lessons Online homework	Workbook activities	Mid-trimester exam	3
6	Revision	Revision	Workbook activities	Mid-trimester exam	3
7	Vectors	Online lessons Online homework	Workbook activities	Test 2 Final Exam	3
Module 4					
8	Complex Numbers	Online lessons	Workbook activities	Test 2 Final exam	4
9	Complex Numbers	Online homework	Workbook activities	Test 2 Final exam	4
Module 5					
10	Probability	Online lessons	Workbook activities	Test 2 Final exam	5
11	Probability	Online homework	Workbook activities	Test 2 Final exam	5

5. Evidence of Learning

5.1 Evidence of Learning Summary

	Evidence of learning	Weighting	Learning outcome	Due Date
1	Test 1 – Algebra, Linear and Quadratic Functions and Matrices	10%	1, 2	Week 4
2	Mid-trimester exam Content from Week 1 - 5	30%	1, 2	Week 6
3	Test 2 – Vectors and Complex Numbers	10%	3, 4	Week 10
4	Online homework and in-class workbook	10%	1, 2, 3, 4,5	Week 1-12
5	Final exam Content from Week 6 - 12	40%	1, 2, 3, 4, 5	Final Exam Week

5.2 Evidence of Learning Task Detail

1. Evidence of Learning Task 1: Test 1 on Algebra, Linear and Quadratic functions and Matrices (10%)

Task Type: Test or quiz

Due Date: Week 4

Weight: 10%, Marked out of: 10

Length: 50 minutes duration

Task Description: This quiz is designed to test understanding of the concepts taught in weeks 1 to 4. Students will be expected to know algebra, linear and quadratic function and what matrices are, their operations and how to use them. Duration of the test will be 50 minutes and it will be held during the first hour of week 4.

Criteria and Marking: This quiz will consist of straightforward calculations on questions relating to algebra, linear and quadratic functions and matrices. Final marks will be posted on Griffith College portal.

Submission: Online test/quiz.

2. Evidence of Learning Task 2: Mid-trimester exam (30%)

Task Type: Examination

Due Date: Week 6

Weight: 30%, Marked out of: 30

Length: 2-hour duration

Task Description: This exam will be made up of problem-solving questions on algebra, functions and matrices. This exam is designed to test understanding of the concepts taught in weeks 1 to 4. Students will be expected to know what a linear and quadratic function is and how to use it. Students will be expected to know what are matrices and their operations. Duration of the exam will be 2 hours and it will be held during week 6.

Criteria and Marking: This exam will test the understanding of the course material and the relevant problem-solving skills. Final marks will be posted on Griffith College portal.

Submission: Online exam.

3. Evidence of Learning Task 3: Test 2 on Vectors and Complex Numbers (10%)

Task Type: Test or quiz

Due Date: Week 10

Weight: 10%, Marked out of: 10

Length: 50 minutes duration

Task Description: This quiz is designed to test understanding of the concepts taught in weeks 5 to 9. Students will be expected to know what a vector is, what operations can be done with vectors and solve worded problems. Furthermore, students will be expected to know what are complex numbers, their operations and how to use them. Duration of the test will be 50 minutes and it will be held during the first hour of week 10.

Criteria and Marking: This quiz will consist of straightforward calculations on questions relating to matrices and vectors. Final marks will be posted on Griffith College portal.

Submission: Online test/quiz

4. Evidence of Learning Task 4: Online homework & in-class workbook (10%)

Task Type: Log of learning activities

Due Date: Week 12

Weight: 10%, Marked out of: 10

Length: n/a

Task Description: Students will be directed to complete exercises during class-time and from online learning resources as the trimester progresses. This environment assesses the ability to solve problems as well as builds self-confidence. Students will be awarded with 10%, or part thereof, for completed work.

Criteria & Marking: To gain the full 10% students will be expected to engage with the online and in-class problems over the course of the trimester.

Submission: Online exam.

5. Evidence of Learning Task 5: Final exam (40%)

Task Type: Exam – selected and constructed responses

Due Date: Final Examination week

Weight: 40%, Marked out of: 40

Length: 2-hour duration

Task Description: This exam will be made up of problem-solving questions on functions, complex numbers and probability. This exam is designed to test understanding of the concepts taught in weeks 5 to 12. Students will be expected to know what a vector is, what operations can be done with vectors and solve worded problems. Students will be expected to know what are complex numbers and their operations. Students will be expected to know what probability is and solve worded problems. Duration of the test will be 2 hours and it will be held during exam week.

Criteria & Marking: This exam will test the understanding of the course material and the relevant problem-solving skills. Final marks will be posted on Griffith College portal.

Submission: Online exam.

In order to pass this Course, students must:

A. demonstrate assurance of learning of all learning outcomes through graded Evidence of Learning Tasks.

5.3 Late Submission

An Evidence of Learning Task submitted after the due date, without an approved extension from the teacher, will be penalised. The standard penalty is the reduction of the mark allocated to the Evidence of Learning Task by 5% of the maximum mark applicable for the Evidence of Learning Task, for each working day or part working day that the task is late. Evidence of learning tasks submitted more than five working days after the due date are awarded zero marks.

Please refer to the Griffith College website - Policy Library > [Assessment Policy](#) for guidelines and penalties for late submission.

5.4 Other Information about Evidence of Learning

Retention of Originals

You must be able to produce a copy of all work submitted if so requested. Copies should be retained until after the release of final results for the Course.

Requests for extension

To apply for an extension of time for an evidence of learning task, you must submit an [Application for Extension of Assignment](#) form to your teacher at least 24 hours before the date the assignment is due. Grounds for extensions are usually: serious illness, accident, disability, bereavement or other compassionate circumstances and must be able to be substantiated with relevant documentation [e.g. [Griffith College Student Medical Certificate](#)]. Please refer to the Griffith College website – [Policy Library](#) for guidelines regarding extensions and deferred Evidence of Learning Tasks.

Return of Evidence of Learning Tasks

1. Marks awarded for in-trimester evidence of learning tasks, except those being moderated externally with Griffith University, will be available on the course site within fourteen [14] days of the due date. This does not apply to the final evidence of learning task in this course (marks for this task will be provided with the final course result).
2. Students will be advised of their final grade through the Digital Campus. Students can review their final exam papers after student grades have been published. Review of final exam papers will not be permitted after the final date to enrol.
3. Marks for **all** evidence of learning tasks including the final exam (if applicable) will be recorded in the Course Site and made available to students through the Course Site.

The sum of your marks of evidence of learning tasks in this course does not necessarily imply your final grade for the course. Standard grade cut off scores can be varied for particular courses, so you need to wait for the official release of grades to be sure of your grade for this course.

6. Policies & Guidelines

Griffith College Evidence of Learning Tasks-related policies can be found in the [Griffith College Policy Library](#) which include the following policies:

[Assessment Policy](#), [Special Consideration](#), [Deferred Assessment](#), [Alternate Exam Sitings](#), [Medical Certificates](#), [Academic Integrity](#), [Finalisation of Results](#), [Review of Marks](#), [Moderation of Assessment](#), [Turn-it-in Software Use](#). These policies can be accessed within the [Policy Library](#)

Academic Integrity Griffith College is committed to maintaining high academic standards to protect the value of its qualifications. Academic integrity means acting with the values of honesty, trust, fairness, respect and responsibility in learning, teaching and research. It is important for students, teachers, researchers and all staff to act in an honest way, be responsible for their actions, and show fairness in every part of their work. Academic integrity is important for an individual's and the College's reputation.

All staff and students of the College are responsible for academic integrity. As a student, you are expected to conduct your studies honestly, ethically and in accordance with accepted standards of academic conduct. Any form of academic conduct that is contrary to these standards is considered a breach of academic integrity and is unacceptable.

Some students deliberately breach academic integrity standards with intent to deceive. This conscious, pre-meditated form of cheating is considered to be one of the most serious forms of fraudulent academic behaviour, for which the College has zero tolerance and for which penalties, including exclusion from the College, will be applied.

However, Griffith College also recognises many students breach academic integrity standards without intent to deceive. In these cases, students may be required to undertake additional educational activities to remediate their behaviour and may also be provided appropriate advice by academic staff.

As you undertake your studies at Griffith College, your teachers and academic advisors will provide you with guidance to understand and maintain academic integrity; however, it is also your responsibility to seek out guidance if and when you are unsure about appropriate academic conduct.

In the case of an allegation of a breach of academic integrity being made against a student he or she may

request the guidance and support of a Griffith College Student Learning Advisor or Student Counsellor.

Please ensure that you are familiar with the Griffith College Academic Integrity Policy; this policy provides an overview of some of the behaviours that are considered breaches of academic integrity, as well as the penalties and processes involved when a breach is identified.

For further information please refer to the Griffith College website - Policy Library > [Academic Integrity Policy](#)

Reasonable Adjustments for Evidence of Learning Tasks – The Disability Services policy

The [Disability Services policy](#) (accessed within the [Policy Library](#)) outlines the principles and processes that guide the College in making reasonable adjustments to Evidence of Learning Tasks for students with disabilities while maintaining academic robustness of its programs.

Risk Assessment Statement

There are no out of the ordinary risks associated with this course.
